

Completed - August 2007 Site Size - 2,314m² Cost - \$3.6M

Originally consisting of three cottages this site at Ashcroft has been transformed into sixteen social housing units. Eight units have been specifically designed to cater for the needs of disabled residents with eight units for general occupation. The development also features underground car parking and a lift to service all floors. Resident amenity, privacy and security are main themes of the design, with private rear yards or balconies, a common area, video intercom entry and security lighting all contained on site.
